

Centro De Neurociências e Biologia Celular

UNIVERSIDADE DE COIMBRA

Job: Research Fellowship (BI)

Job/Fellowships Reference: PTDC/CTM/099659/2008, funded by FCT

Main research field: Bionanotechnology

Job summary: Biomaterials and Stem Cell-based Therapeutics Research Group at the Center for Neuroscience and Cell Biology (http://www.cnbc.pt/research/areaB5_2.asp?lg=2) is recruiting a highly motivated research fellow to contribute for the project "Nanomaterials for cell tracking". The main goal of the project is to develop novel nanomaterials and study their interaction with stem cells. The candidate will be integrated in a team formed by researchers from different scientific backgrounds.

The candidate should have (or in the process of having) a Master degree in one of the following areas: Biochemistry, Pharmacy, Biology, Biological Engineering, Chemical Engineering, Biomedical Engineering or related. The candidate should have good English language skills. The position is for a period of 12 months, renewable up to 24 months depending on the performance. The selected candidate can start the position on June 1st, 2010. The monthly salary will be 980 Euros, plus Social Security reimbursements. Applications should be sent by e-mail to Dr. Lino Ferreira (lino@biocant.pt) until May 24th, 2010.

Place of employment: The employment will be at Biocant, located in Cantanhede (<http://www.biocant.pt/Default.aspx>). We have state of the art facilities for stem cell culture and characterization. More about our research group can be seen at the website: <http://biomaterials.biocant.pt>;

To apply: Please send a single PDF file with the full CV including detailed scientific experience, two reference letters and why the candidate is applying for this position to Dr. Lino Ferreira (lino@biocant.pt). Future interviews might be necessary.
